FOR NONPROFIT ORGANISATIONS AND PROJECT PARTNERS

Your project’s missing piece

The funding context in Finland

Finnish example: STEA

STEA supports health and social welfare nonprofits in Finland. Its proposed 2027 funding is about €190 million, around a third less than in 2026. [1]

For international partners

This example concerns Finnish funding. Other national and EU calls have their own eligibility rules, eligible costs and expected outcomes.

A clearly defined service can help demonstrate concrete, measurable activities.

↓

THE MISSING PIECE

Digital service

A practical measure that can support the funder’s objectives.

↓

Digiter ry brings that piece

Design, implementation, data protection, maintenance

↓

A digital service can strengthen your application

Make the proposed activities and expected results easier to demonstrate.

Agree how the service will continue after the project.

Start by telling us what you need. Before committing, agree the scope, costs and responsibilities.

A digital service does not guarantee eligibility or a funding award. The call’s rules and the funder’s assessment determine the outcome. Any work before a funding decision is agreed separately.
